

## Lecture 2 Quiz Questions and Answers

### 1 Select the correct statement

control system consists subsystems and processes

☐ 0%

if the output is controlled then it is a control system

☐ 8%

control systems can be open loop or closed loop

☐ 15%

all of the above ☒

☐ 0%

none of the above

☐ 8%

### 2 Select the wrong statement

a system that involves machines only called feedback control ☒

☐ 21%

driving a car can be considered manual control

☐ 21%

automatically controlled systems exist in nature

☐ 7%

all of the above

☐ 0%

none of the above

☐ 14%

3

Select the correct statement

control systems can't compensate disturbances

☐ 0%

control systems can only be useful in remote operation

☐ 0%closed-loop systems are less sensitive to noise ☒

all of the above

☐ 15%

none of the above

☐ 23%

4

Select the wrong statement related to design of a feedback control system:

if testing shows that requirements have not been met, the system must be redesigned and retested

☐ 8%

as a part of the design, description of the physical system transforms into a schematic diagram

☐ 23%

subsystem models are interconnected to form block diagrams of larger systems

☐ 0%

all of the above

☐ 23%none of the above ☒

5

Select the correct statement

Block diagrams cannot be used for open loop control system design

☐ 0%

flow of signals can be clearly seen in a block diagram

☐ 0%

block diagram algebra can be used to reduce block diagrams

☐ 15%

1 and 3

☐ 8%

2 and 3 ☒
